

## Hydrating Suncare Oil (60ml)

*Suitable for all skin types.*

**100% natural; 98.36% certified organic**

### Description

The Hydrating Suncare Oil is a natural blend of nourishing oils that are mixed with an exotic range of certified organic essential oils. It helps control your skin's reaction to sun exposure by slowly tanning in a natural way. Jasmin Suncare Oil prevents the drying effects of the sun by nourishing and hydrating your skin. It provides you with a healthy glowing look and is rich in natural antioxidants, vitamins and nutrients.

### Key ingredients

**Sesame Oil** has been used for thousands of years for its effects on dry, dehydrated and flaking skin such as eczema and also for its ability to provide a low level of protection from UV rays.

**Hazelnut** is toning to wrinkled skin and works well as an emollient. Due to its high essential fatty acid content **Rosehip** works well to repair skin and reduce redness and damage.

### Use

Apply to already moist skin. It is best if you do this every day, especially a few days prior to your first exposure to the sun. This will feed the skin, provide moisture and naturally prepare it to cope with the sun. (The Hydrating Suncare Oil is a suncare product not a sun block.)
